## EXPERIENCE

### Software Developer - Innovation

June 2024 – Present

*Navneet Education Ltd*

*Remote*

- **Led development of 5+ MVP projects** tested by a wide range of users, resulting in a **20%** improvement in product relevance based on feedback.
- **Mentored and supervised a team of interns**, increasing output through optimized workflows and technical guidance.
- **Reduced application load times by 30%**, significantly enhancing user experience and boosting engagement by **15%**.
- **Integrated backend services using RESTful APIs**, which improved data fetching efficiency and reduced data fetch errors by **10%**.

### Web Developer Intern

Aug 2023 – Oct 2023

*OctaNet Services Pvt Ltd.*

*Remote*

- **Collaborated on 4+ web development projects**, using **JavaScript and React** to build responsive apps that increased engagement by **25%**.
- **Implemented real-time features**, such as interactive forms, improving user retention by **15%**.
- **Improved app performance**, reducing response times by **20%** through code optimization.

## PROJECTS

### NFTverse - NFT Marketplace | *React 18, Tailwind CSS, Node.js, Express, MongoDB, Ethereum* — Live Demo

- **Developed a decentralized NFT marketplace**, enabling users to browse and buy digital assets, with **over 100 users** testing the platform during its early deployment phase.
- **Integrated blockchain technology with Ethereum-based wallet support**, laying the groundwork for future features such as minting and selling NFTs.
- **Built a scalable backend**, using Node.js, Express, and MongoDB, with Ethers.js integration for smooth transactions once minting is enabled.
- **Optimized the platform's frontend**, reducing load times and enhancing responsiveness, with initial testing resulting in a **10% increase in user engagement**.

### AI Meeting Assistant | *React.js with Vite, TailwindCSS, Microsoft Cognitive Services, OpenAI API* — Live Demo

- **Created an AI-powered platform** for transcribing and analyzing meetings, which boosted team productivity by **30%** due to actionable insights and time-saving transcription.
- **Implemented real-time speech-to-text conversion** for virtual and in-person meetings, enhancing **user engagement and meeting quality**.
- **Automated categorization** and action tracking, assigning tasks based on insights, reducing manual task assignment time by **20%**.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, HTML/CSS, Java, C/C++, SQL (PostgreSQL)

**Frontend Technologies:** React, React Native, Tailwind CSS, HTML5, CSS3, Bootstrap, jQuery

**Backend Technologies:** Node.js, Express.js, RESTful APIs, GraphQL

**State Management:** Redux, Context API

**Database Technologies:** SQL (PostgreSQL), NoSQL (MongoDB)

**Cloud and DevOps:** Google Cloud Platform (GCP), Docker, Travis CI, Jenkins

**Version Control and Tools:** Git, GitHub, GitLab, Visual Studio Code, Visual Studio

**Other Tools:** Figma, Jira, Trello, Postman

## EDUCATION

### G.H Raisoni University

*Master's in Computer Application*

Nagpur, In

*Aug. 2022 – Dec 2024*
